

MULTI CHANNEL ULTRASONIC INSTRUMENT

- Digital Operation
- User Friendly
- Repeatability
- Wide Measurement Options

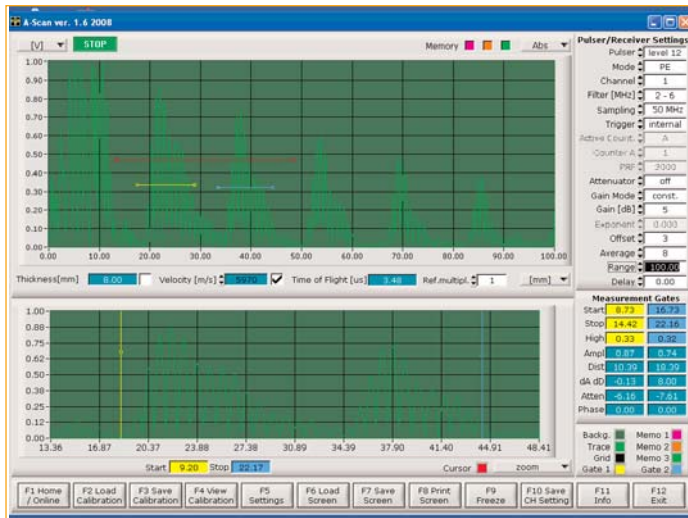

... .. Experience it all!

DIGITAL ULTRASONIC ELECTRONICS

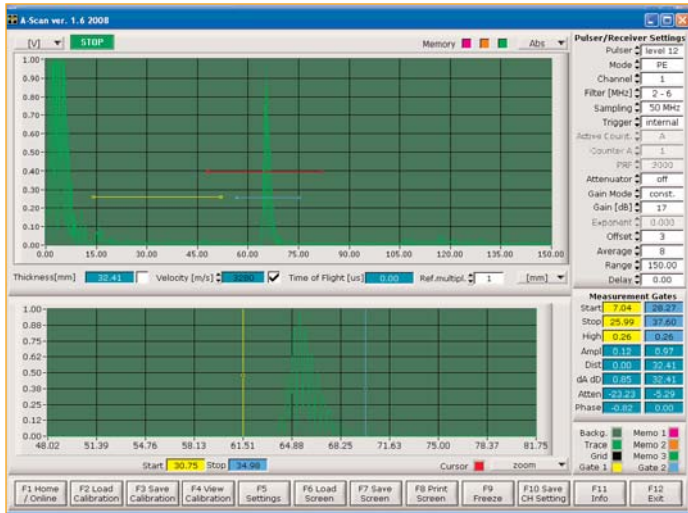

TECHNOLOGY

In combination with a modular designed software architecture, ultrasonic hardware and suitable PC hardware, these products permit custom configurations for a wide range of client-specific applications, from simple ultrasonic inspections through fully automated inspections exhibiting excellent ultrasonic and inspection performance.

ULTRASONIC HARDWARE

Inspection electronics consist of multi-channel ultrasonic system computers, comprising of 8 channels respectively. Each channel is independently programmed for its parameters.

TYPICAL FEATURES/SPECIFICATION:

- Fully integrated PC-based ultrasonic, data acquisition and motion control (optional).
- High power Pulser for optimum penetration.
- Multiplexed channel operation.
- Frequency from 0.2MHz to 25MHz.(Options)
